

MSSL POLICY: CONTROL OF LEGIONELLA

Marcegaglia Stainless Sheffield Limited complies with UK Control of Substances Hazardous to Health (CoSHH) Regulations: This Policy Statement sets out the main principles to controlling Legionella at MSSL production sites.

Main Principles

1. The Head of Operations is the Duty Holder accountable for control of Legionella and will appoint a suitable Person Responsible for the implementation of this policy.
2. Procedures and written systems of control shall be implemented to identify the industrial and domestic water systems at MSSL sites and stipulate requirements for this policy including:
 - a. Risk assessment
 - b. Safe operation
 - c. Monitoring and testing
 - d. Methods for prevention of Legionella infection, including measures for equipment and treatment of water
 - e. Training and awareness of Legionella for MSSL personnel.
 - f. Compliance records and reporting to relevant authorities.
3. Contractors who provide services for the control of Legionella at MSSL sites shall be selected on the basis of suitable (accredited) qualifications and verified experience.
